CVX is not meant for very large problems, so if your problem is very large (for example, a large image processing or machine learning problem), CVX is unlikely to work well (or at all). For such problems you will likely need to directly call a solver, or to develop your own methods, to get the efficiency you need.

The CVX Users' Guide

Puma CVX tractors are available with CVX continuously variable drive technology, offering seamless travel from standstill up to 50 km/h, which can be achieved at a fuel-frugal 1,550 rpm (Puma 185-240 CVX). CVX transmissions use a DKT (Doppel-Kupplungs-Technologie) double clutch system for optimal performance.
