In a 1986 application for a zoning amendment, the city planning commission stated its case: "The proposed amendment to the Zoning Resolution is a response to accelerating changes in Times Square that could threaten its unique character, which for nearly a century has made this space symbolic of the vitality and dynamism of New York City itself."

How Times Square Became the Glowing Heartbeat of New York City

Cities can design streets and the built environment to be safer, not only in new communities, but also by transforming existing neighborhoods and streets. Considering a comprehensive street network and the hierarchy of its users can reveal opportunities not only around critical transit corridors, but in the surrounding neighborhood streets.

Cities Safer By Design - World Resources Institute

Architects and planners have an obligation to protect health, safety and welfare through the spaces we design. As the George Floyd protests reveal, we've failed.

How to Design Justice Into America's Cities - Bloomberg

The Cities Programme is dedicated to the understanding of urban society and urban change and focuses on the relationships between the social and spatial life of cities. The Cities Programme provides an innovative environment for critical engagement and creative learning, exploring the relations between city design and the political, economic and cultural organisation of cities.

Cities Programme - Ise.ac.uk

This collection of essays is part of the Social Life of Cities, a global program of practical, local innovation exploring the relationship between digital technology and urban development in creating socially sustainable, thriving, and resilient communities.

The social life of cities

The MSc City Design and Social Science focuses on the relations between the physical and social organisation of cities and urban environments. We see design as a field of research, knowledge and practice that shapes urban environments, responds to urban problems, and integrates social,

spatial and physical approaches to the city.

MSc City Design and Social Science

In our context, this usually means unraveling complex social service processes with the goal of identifying areas for improved efficiency or results. We've tailored tried-and-true design methods to complement and support the expertise of the City employees who develop and deliver New York City's programs.

Service Design Studio - NYC Opportunity

As the feminist geographer Jane Darke has said: "Our cities are patriarchy written in stone, brick, glass and concrete." In other words, cities reflect the norms of the societies that build them.

Social structures and processes shape the spatial form of the city. Because city planning can shape the spatial form of cities, it also has an impact on the social life of cities. A number of dimensions of this reciprocal relationship between planning and the social environment are of interest to sociologists.

City Planning - Urban Sociology - iResearchNet

Cities across Africa, Asia and Latin America are facing hard choices given that, in many areas, social distancing measures were a virtual impossibility to begin with.
