Data Push Apps with HTML5 SSE [Book] - O'Reilly Media
Server-Sent Events (SSE) is an HTML5 technology that allows the server to push fresh data to clients (commonly called data push). So, just what is data push, and how does it differ from anything else you may have used? Let me answer that by first saying what it is not. There are two alternatives to data push: no-updates and data pull.

Data Push Apps With Html5 Sse - youtransport
An HTML5 mobile app is essentially one or more web pages that are designed to work on a small mobile device screen. As such, HTML5 apps are device agnostic and can be opened with any modern mobile browser. Because your content is on the web, it's searchable, which can be a huge benefit for certain types of apps (shopping, for example).
