Student-Centered Learning, also known as learner-centered education, broadly encompasses methods of teaching that requires learners to actively construct their own knowledge, and puts the responsibility for learning on the them. The teacher still has an authoritative role, but the students and the teachers play an equally active part in the learning process.

Although learner-centered education is claimed to have several learning gains, research suggests that teachers' attitudes and practices play a crucial role in promoting its prolific outcomes. This study examines the adaptation of learner-centered education and examines how it has been implemented in second language teaching by university teachers since launching an educational shift embodied ...

Teacher-Centered Versus Learner-Centered Learning

World language teachers have one goal: to develop students' ability to communicate in the target language. Over the last 30 years, the field of world language education has undergone a major paradigm shift, moving away from verb conjugation charts, grammar rules, and vocabulary lists toward student-centered activities that provide target language input in a meaningful and authentic way.
