Some time back, I wanted to learn about programming FPGAs. I

started googling only to find that there is no FPGA tutorial on the web (that is the case when this tutorial was originally written. But there should be more FPGA tutorials available online now!) that can get you started with learning a little bit of HDL and take you all the way through design, simulation, and implementation.

Before beginning to program your FPGA board, developers, programmers, and manufacturers must first understand the language behind programming Field Programmable Gate

Arrays. HDL (Hardware Descriptive Language) is the term that describes the program needed to program FPGAs.
