system of MikroTik RouterBOARD hardware. It can also be installed on a PC and will turn it into a router with all the necessary features - firewall, routing, wireless access point, bandwidth management, hotspot gateway, backhaul link, VPN server and more.

Mikrotik RouterOS - About RouterOS

The Mikrotik firewall, based on the Linux iptables firewall, is what allows traffic to be filtered in, out, and across RouterOS devices. It is a different firewall implementation than some vendors like Cisco, but if you have a working knowledge of iptables, or just firewalls in general, you already know enough to dive in. Understanding the RouterOS firewall is critical to securing your devices and ensuring that remote attackers can't successfully scan or access your network.

Mikrotik Firewall — Manito Networks

MikroTik is a Latvian company which was

File Type PDF Routeros Firewall Mikrotik

founded in 1996 to develop routers and wireless ISP systems. MikroTik now provides hardware and software for Internet connectivity in most of the countries around the world.
