When a Ford Focus exhibits problems with running roughly at idle speeds, auto mechanics generally look first to either a vacuum problem, or more often, a problem with water getting into the Differential Pressure Feedback Sensor

(DPFE), a part of the EGR (exhaust gas recirculation system). This is a notorious problem with Focus models built ...

In order to install a cold air intake on the Focus, the battery must be removed to run the pipe underneath. Begin by taking the cables off the battery and lift it from the battery box. Then unscrew the 3 bolts holding the box in, and remove it from the car, unclipping the cables from the back and side.
