15 Tough Storage Interview Questions to Prepare for Success

A storage area network or storage network is a computer network which provides access to consolidated, block-level data storage. SANs are primarily used to access storage devices, such as disk arrays and tape libraries from servers so that the devices appear to the operating system as direct-attached storage. A SAN typically is a dedicated network of storage devices not accessible through the local area network. Although a SAN provides only block-level access, file systems built on top of SANs d
