## **SAP BW Data Modeling**

The data modeling in SAP BW changes due to these new possibilities. In classic systems, master data – even if they originate from different tables and systems – had to be consolidated into an InfoObject if you did not want to expand the transaction data. This has led to large, inflexible info objects.

## **Agile Data Warehousing with SAP BW/4 HANA | SAP Blogs**

Modeling of data in SAP BW/4HANA helps you to merge data into models and to make these available for reporting and analysis purposes. The central entry point for modeling in SAP BW/4HANA is the data flow.. For modeling purposes, we recommend using the layer architecture for data warehouses, known as LSA++.
