New tutorials take a fair amount of time to write (generally 3 to 5 solid working sessions). Writing the core material tends to take 1 to 2 sessions, then another 1 to 2 sessions to think up, implement, and test examples that demonstrate the material, and then another day for review, polish, and edits. Creating quiz questions takes even longer.

This is done using a sports championship style bracket. The algorithm trains a large number of models for a few epochs and carries forward only the top-performing half of models to the next round. Hyperband determines the number of models to train in a bracket by computing $1 + \log$ factor (max_epochs) and rounding it up to the nearest integer.
